

Management Commitment

LEA Networks management is responsible for the design, implementation and continuous improvement of our Quality Management System.

LEA Networks is a trusted supplier of innovative communication products for almost 20 years. As we aim at being a leader in all the fields we are active in, we have implemented the ISO9001:2015 and TL9000 Quality Management Standards. Our main objectives are:

- To satisfy our customers** as well as all other interested parties: employees, suppliers and share-holders, by designing, manufacturing and selling innovative products with a high level of quality;
- To achieve profitable growth** that will allow us to perform better year after year, and improve our resilience in an ever changing environment;
- To have a responsible footprint** by developing processes and technologies that respect people and the environment.

As the CEO of LEA Networks, I take direct and full responsibility in leading the Quality policy of the Company. To achieve this goal:

- I encourage every employee to read and implement all procedures and provide feedback on efficiency and ways to improve our overall performance.
- I will ensure that customer feedback is periodically shared across the organization, and more generally that information flows efficiently.
- I shall maintain a very high level of skills and involvement in an enjoyable work environment.

Thierry FERNANDEZ
